ITEMS FOR ACTION (2):

1. Changes to the Interdisciplinary Certificate in Aging • Faculty of Health

The Curriculum Committee recommends,

That Council approves the following changes to Interdisciplinary Certificate in Aging housed in the Faculty of Health, as set out in Appendix A, effective FW 2019-2020:

- Addition of HH/KINE 4646 3.00, HH/ HLST 3520 3.00 and HH/HLST 3530 3.00 to the list of optional courses.
- Adding the 3-credit version of the same course for AP/SOCI 3550 6.00 Sociology of Aging

Rationale:

The proposed changes provide more opportunity for students to complete the 12 optional credits for the certificate requirements.

2. Changes to York-Seneca Rehabilitation Services Certificate Program • Department of Psychology • Faculty of Health

The Curriculum Committee recommends,

That Council approves the following changes to York-Seneca Rehabilitation Services Certificate Program, as set out in Appendix B, effective FW 2019-2020:

- Eliminate HH/PSYC 3430 3.00 and AP/SOCI 3820 6.00
- Addition of HH/PSYC 3170 3.00 to the certificate requirement

Rationale:

In addition to the revised curriculum being more balanced and feasible for students from a workload perspective across the two years, the addition of Health Psychology as a required course will better prepare students to work in a variety of rehabilitation fields. This will enable students to acquire a scientific understanding of the principles and theory underlying the field of health psychology, which will in turn contribute to their ability to apply that knowledge out in the field.

HH/PSYC 3430 3.00 – Behaviour in Groups, this course was deemed less of a priority than HH/PSYC 3170 3.00 – Health Psychology which has more relevance for this program.

In terms of excluding AP/SOCI 3820 6.00; the first-year of this program is heavy for students as they need to meet the YSR requirements at York and Seneca to prepare for their final year. In addition, students are also required to complete 200 volunteer hours per term which makes it difficult for YSR students to add this to their schedule as this course, as a full course, extends full academic year.
Non-Major Modification Program Changes

1. Program: York-Seneca Rehabilitation Program
2. Degree Designation: BA or BSc
3. Type of Modification:(Example: changes to degree / admission requirements): Changes to degree requirements
4. Effective Date: FW2019-2020
5. State what the changes are (Example: increase / decrease to the number of major credits):
   Eliminate HH/PSYC 3430 3.00 and AP/SOCI 3820 6.00 from the degree requirements. Add the degree requirement HH/PSYC 3170 3.00
6. Provide the rationale for the proposed changes that is rooted in the program learning outcomes.
   In addition to the revised curriculum being more balanced and feasible for students from a workload perspective across the two years, the addition of Health Psychology as a required course will better prepare YSR students to work in a variety of rehabilitation fields. This will enable students to acquire a scientific understanding of the principles and theory underlying the field of health psychology, which will in turn contribute to their ability to apply that knowledge out in the field.
   
   PSYC 3430 – Behaviour in Groups, this course was deemed less of a priority than PSYC 3170 – Health Psychology which has more relevance for this program.

   In terms of excluding AP/SOCI 3820; the first-year of this program is heavy for students as they need to meet the YSR requirements at York and Seneca to prepare for their final year. In addition, students are also required to complete 200 volunteer hours per term which makes it difficult for YSR students to add this to their schedule as this course, as a full course, extends full academic year.

7. Provide an updated mapping of the program requirements to the program learning outcomes to illustrate how the proposed requirements will support the achievement of program learning objectives.

   The proposed requirements will support the achievement of the program learning outcomes since students in the YSR will meet these requirements through the Psychology program. See below Year 3 of BA/BSc or Honours BA/BSc (also known as Year 1 of YSR program):

   BA/BSc Psychology Degree: 90 credit and Honours

   1. Depth and Breadth of Knowledge:
      • Demonstrate broad knowledge of psycho/social determinants of behaviour.
      • Demonstrate broad knowledge of cognitive/biological determinants of behaviour.
      • Demonstrate in-depth knowledge in at least 2 sub-disciplines.
      • Critically evaluate, synthesize and resolve conflicting results.
• Describe and evaluate current theory and research in core areas.

2. Application of Knowledge:
• Understand and interpret psychological information in everyday life.
• Articulate trends in sub-disciplines of psychology.
• Locate research articles and show critical thinking about research findings.

3. Communication Skills
• Express psychological knowledge in written form in more than 1 sub-discipline.
• Engage in evidence-based dialogue with course director and peers

4. Awareness of Limits of Knowledge
• Define causes of human behaviour from different perspectives.
• Describe and explain limits to generalizability of research findings.

5. Autonomy and Professional Capacity
• Demonstrate ability to relate information in psychology to own and others’ life experiences
• Demonstrate an ability to work with others.

The above courses are the Program Learning Outcomes for all required for all PSYC, YSR course (not including PSYC 1010, PSYC 2020/2021/2022 and PSYC 2030 as these are required for all Psychology majors).

8. If relevant, summarize the consultation undertaken with relevant academic units, including commentary on the impact of the proposed changes on other programs. Provide individual statements from the relevant program(s) confirming consultation and their support.

The UPD in Sociology was consulted via email. Email attached.

9. Describe any resource implications and how they are being addressed (e.g., through a reallocation of existing resources). If new/additional resources are required, provide a statement from the relevant Dean(s)/Principal confirming resources will be in place to implement the changes.

Not applicable. Course being added is offered each term.

10. Provide a summary of how students currently enrolled in the program will be accommodated.

If students completed courses as per the old requirements, would be eligible to follow the old requirements as these courses are still offered.

11. Provide as an appendix a side-by-side comparison of the existing and proposed program requirements as they will appear in the Undergraduate or Graduate Calendar.

Please see below.

**ADMISSION REQUIREMENTS**

Students who wish to enter the York-Seneca Rehabilitation Services Certificate program should apply to the psychology department in the year preceding the final year of their BA or BSc degree program. While the program is targeted to undergraduates in the Psychology program, students in the Kinesiology and Health Science program may also apply provided the required psychology courses for the joint program can be met. Students from other York University degrees (other than Psychology and Kinesiology) and/or those with a minor in psychology, who have appropriate volunteer and/or work experience will also be eligible to apply for the Rehabilitation Services Certificate York/Seneca Program.
The application deadline is normally in early March. In order to be eligible to apply, applicants must have:

- completed 60 University-level credits towards a BA or BSc or 90 University-level credits towards an Honours BA or Honours BSc with a minimum cumulative grade point average of 5.00 (C+);
- completed HH/PSYC 1010 6.00 (Introduction to Psychology) with a minimum grade of C;
- fulfilled the general education requirements of York University;
- good intellectual ability, emotional stability and a strong interest in working with individuals with various types of disabilities;
- previous employment or volunteer work experience in the field of rehabilitation is recommended, but not required.

In order to be considered for admission, all applicants must submit a complete application (i.e. application form, official transcripts and two letters of recommendation). Students from other universities should contact ysrehab@yorku.ca for further information about applying to this program.

Further information about this program and online instruction applications are available at the following website: [http://psyc.info.yorku.ca/york-seneca-rehabilitation-services-certificate-program/](http://psyc.info.yorku.ca/york-seneca-rehabilitation-services-certificate-program/).

**FOR STUDENTS COMPLETING THE HONOURS BA OR HONOURS BSC DEGREE**

**Years 1, 2 and 3**

**Requirements at York**
90 credits including HH/PSYC 1010 6.00 (with a minimum grade of C). So as not to exceed the maximum number of credits allowed by the Psychology program, students should not take more than 24 credits towards the major (including HH/PSYC 1010 6.00) and some of these should be from the required list of the joint program.

**Years 4 and 5**
Students will proceed to take the courses listed under Years 3 and 4 below.

**FOR STUDENTS COMPLETING THE HONOURS BA OR HONOURS BSC DEGREE**

**Years 1, 2 and 3**

**Requirements at York**
90 credits including HH/PSYC 1010 6.00 (with a minimum grade of C).
Note: in addition to completing the above courses, students must also fulfill their specific degree requirements (for a detailed description of degree requirements, please refer to the Programs of Study description for the major).

FOR STUDENTS COMPLETING THE BA OR BSC DEGREE

Years 1 and 2

Requirements at York
60 credits including HH/PSYC 1010 6.00 (with a minimum grade of C). So as not to exceed the maximum number of credits allowed by the Psychology program, students should not take more than 12 credits towards the major (including HH/PSYC 1010 6.00) unless taken from the required list for the joint program.

Year 3 (Year 1 of program)

Requirements at York
HH/PSYC 2130 3.00, HH/PSYC 3140 3.00, HH/PSYC 2230 3.00, HH/PSYC 3430 3.00 and AP/SOCI 3820 6.00.

Requirements at Seneca
YSR 819 Physical Disabilities - Part I, YSR 824 Interviewing and Case Management, YSR 826 Community Resources, YSR 828 Introduction to Rehabilitation and FWK 901 Rehabilitation Field Work (two days per week-two semesters).

Year 4 (Year 2 of program)

Requirements at York
HH/PSYC 4030 6.00 and HH/PSYC 4060 6.00.

Requirements at Seneca
YSR 820 Physical Disabilities - Part II, YSR 821 Theories of Vocational Development and Counselling, YSR 823 (half course) Canadian Social Policy Evolution, YSR 825 Rehabilitation Process (two semesters), YSR 901 Life Skills Coaching, and FWK 902 Rehabilitation Field Work (two days per week-two semesters).

Note: in addition to completing the above courses, students must also fulfill their specific degree requirements (for a detailed description of degree requirements, please refer to the Programs of Study description for the major).

FOR STUDENTS COMPLETING THE BA OR BSC DEGREE

Years 1 and 2

Requirements at York
60 credits including HH/PSYC 1010 6.00 (with a minimum grade of C).

Year 3 (Year 1 of program)

Requirements at York
HH/PSYC 2130 3.00, HH/PSYC 3140 3.00, HH/PSYC 2230 3.00, HH/PSYC 3430 3.00 and AP/SOCI 3820 6.00.

Requirements at Seneca
YSR 819 Physical Disabilities - Part I, YSR 824 Interviewing and Case Management, YSR 826 Community Resources, YSR 828 Introduction to Rehabilitation and FWK 901 Rehabilitation Field Work (two days per week-two semesters).

Year 4 (Year 2 of program)

Requirements at York
HH/PSYC 4030 6.00 and HH/PSYC 4060 6.00.

Requirements at Seneca
YSR 820 Physical Disabilities - Part II, YSR 821 Theories of Vocational Development and Counselling, YSR 823 (half course) Canadian Social Policy Evolution, YSR 825 Rehabilitation Process (two semesters), YSR 901 Life Skills Coaching, and FWK 902 Rehabilitation Field Work (two days per week-two semesters).

Hi Deborah,

Sure - happy to elaborate. The YSR is a two year program and our students have generally found the 2nd year to be particularly heavy because alongside their YSR requirements they must also fulfill their Psychology degree requirements. In the old curriculum structure this meant that during the 2nd year of the YSR program, our YSR students had to complete two, full required psychology courses + an honours thesis + 3 full Seneca courses + 200 field placement hours. This led to the USC undertaking a re-examination of the YSR curriculum and a subsequent rejigging of the program requirements such that the psychology course requirements are more evenly and manageably distributed over the two years. More specifically, this meant moving the Behaviour Modification course to the 1st year. The USC also deemed Health Psychology to be a necessary course for the YSR diploma. So essentially we have had to re-establish priorities for required courses for our YSR students such that they were not overburdened now in the 1st year - which led to the decision to remove AP/SOCI 3820 6.0 as a required course. Having said that, we are happy to continue to encourage YSR students to take SOCI 3820 as an elective.

I hope this information clarifies things, but pls let me know if you or Zuzana have any more questions,

Thanks,

Karen

Hello Karen,

Nice to meet you. Thanks for this information.

The Undergraduate Program Committee and the faculty member who usually teaches the course wonders if they can have a sense of why this was changed.

Regards, Deborah

CC Report - Appendix A
Dear Deborah,

We have not had an opportunity to meet as yet but I'm the UPD for Psychology. I'm writing to update you on a recent curriculum change that was approved by the Psychology USC with respect to our York-Seneca Rehabilitation certificate program. We have made a change to course requirements such that students will no longer be required to take AP/SOCI 3820 6.0 Sociology of Health and Health Care. We thought that you would appreciate being informed of this change. Please let me know if you have any questions.

Kind regards,

Karen

Non-Major Modification Program Changes

1. Program: Interdisciplinary Certificate in Aging

2. Degree Designation: Certificate

3. Type of Modification: (Example: changes to degree / admission requirements)
   - A) Addition of Kinesiology and Health Science course to selection of optional courses.
   - B) Addition of two School of Health Policy and Management (SHPM) courses to selection of courses that are optional.
   - C) Update the calendar copy to reflect the change in number of credits for the AP/SOCI 3550 6.00 to include the 3 credit version of the course as LAPS created this change after the Certificate was originally launched.

4. Effective Date: September 2019

5. State what the changes are (Example: increase / decrease to the number of major credits)
   - A) Add KINE 4646 3.00 “Delivering Exercise to the Aging: Knowledge to Action” to the list of optional courses for the Certificate in Aging.
   - B) Add HLST 3520 3.00 ‘Aging: Comparative perspectives’ and HLST 3530 3.00 ‘Population Aging and Health: Policies, Programs, and Issues’ to the list of optional courses students can select from to complete the Certificate in Aging.
   - C) Add in 3 credit version of the same course for AP/SOCI 3550 Sociology of Aging

6. Provide the rationale for the proposed changes that is rooted in the program learning outcomes.
   - A) Adding KINE 4646 3.00 as an optional selection provides more opportunity for students to complete the 12 optional credits for the certificate requirements.

KINE 4646 contributes to the following Aging Certificate program level objectives:
- Facilitate/promote independence from patient focused perspective;
- Reflect on aging issues from a diverse cultural perspective;
- Use knowledge in response to circumstances, specifically the course learning outcomes are
  - Describes anatomical and physiological changes with aging,
  - Defines needs associated with these changes,
  - Describes multiple views of aging (cognitive, physical, functional);
- Designs intervention capacity regarding mental health concerns and other age related concerns, i.e.,
  - Determines what aging individual needs in order to define preventative and proactive health care.
- Research/analysis to problem solve on a case-by-case basis, i.e.,
Applying own healthcare solution

B) By adding in the two HLST course we will be giving students more opportunities for fulfilling the 12 credits from the list of optional courses. In addition, it creates the opportunity for students completing their BHS degree in SHPM to also enroll in discipline specific courses that can contribute to them fulfilling the requirements for the Certificate in Aging making the Certificate in Aging potentially more attractive to them.

HH/HLST 3520 3.00 Aging: Comparative Perspectives and HH/HLST 3530 Population Aging and Health: Policies, Programs, and Issues contributes to the following learning outcomes for the Certificate in Aging:
- Reflect on aging issues from a diverse cultural perspective;
- Advocates on behalf of older adult;
- Use knowledge in response to circumstances, specifically the course learning outcomes are
  - Defines needs associated with these changes,
  - Defines Ageism/social attitudes,
  - Describes multiple views of aging (cognitive, physical, functional);
- Designs intervention capacity regarding mental health concerns and other age related concerns, specifically the course learning outcomes are
  - Navigates and shows others the health care system;
- Research/analysis to problem solve on a case-by-case basis.

The only course learning outcome that is unique to HH/HLST 3530 Population Aging and Health: Policies, Programs, and Issues and applies to the Certificate in Aging is that students in this course ‘determine what an aging individual needs in order to define preventative and proactive health care’ and by so doing this learning outcome contributes to the Certificates program level objective of “Designs intervention capacity regarding mental health concerns and other age related concerns”

C) Currently students are given permission to either take AP/SOCI 3550 6.00 or AP/SOCI 3550 3.00 as a substitute for AP/SOCI 3550 6.00 to fulfill the certificate requirements. We are just updating the university calendar to reflect the change to credit weighting.

7. Provide an updated mapping of the program requirements to the program learning outcomes to illustrate how the proposed requirements will support the achievement of program learning objectives.

   See Appendix A (excel spreadsheet) for these details (text in red are the additions).

8. If relevant, summarize the consultation undertaken with relevant academic units, including commentary on the impact of the proposed changes on other programs. Provide individual statements from the relevant program(s) confirming consultation and their support.

Consulted with Kinesiology and Health Science Chair and School of Health Policy and Management program director and curriculum committee as they are the programs who will be offering the additional courses being included. (see Appendix B)

9. Describe any resource implications and how they are being addressed (e.g., through a reallocation of existing resources). If new/additional resources are required, provide a statement from the relevant Dean(s)/Principal confirming resources will be in place to
implement the changes.

No new resources required. In fact, one of the reasons we can now add in these courses is that new hires in the individual schools have created the opportunity to offer these courses more regularly.

10. Provide a summary of how students currently enrolled in the program will be accommodated.

In general, students currently in the certificate program will be able to take any of the new courses to meet the certificate requirement. Specifically,

A) Students who are currently interested in attaining the Certificate are being given permission to enroll in KINE 4646 to complete their certificate requirements.

B) Beginning in September 2019 students who are currently enrolled in the Certificate can be also granted permission to count HLST 3520 and/or HLST 3530 as contributing to the 12 credits required from the optional list of courses to satisfy the Certificate in Aging requirement.

C) Currently, students are given permission to take AP/SOCI 3550 3.00 as a substitute for AP/SOCI 3550 6.00

11. Provide as an appendix a side-by-side comparison of the existing and proposed program requirements as they will appear in the Undergraduate or Graduate Calendar.

See Appendix C for these details (underlined are the additions).

Subject: Fwd: recommended changes to the certificate in aging

Hi Susan
On regard to your request - we had received only one comment (see below). In general KHS is supportive but thought we needed to let you know about Brads comments.

Subject: Re: recommended changes to the certificate in aging

Hi Angelo,

The addition of 4646 as an "either/or" option with 4645 might be based on the fact that 4645 hasn't been taught since 2013 (until this current term). Now that 4645 is taught this year, and next, and every year in the near future as we discussed in our last meeting (other than my sabbatical year), they may want to reconsider this proposed change. Their rationale for having the either/or option between these two courses might restrict students from completing both. This is important given that, from my understanding, 4646 is more closely related to 3350 than 4645. So, students would benefit from having both of these fourth-year courses in terms of being exposed to a broader range of aging-related topics. I'm wondering, if students complete both 4645 and 4646 will they only get credit for one based on this new change? Perhaps one of those courses would count toward another open-aging course requirement for that program? Just somethings to think about. I'm happy to chat more with you or Susan/Tamara if that would help.

Cheers,
Brad.

Brad A. Meisner, Ph.D.
Hi Susan,
Yes, our School is supportive of adding those two HLST courses as electives in the Certificate of Aging.
Ellen

### Cross-Disciplinary Certificate in Aging

**Coordinator:** TBA

**Admission:** Students enrolled in an undergraduate degree program in the Faculty of Health are expected to apply for entry to the Certificate in Aging normally prior to completion of 36 credits of their undergraduate degree program. The applicant must indicate that he/she has completed all of the prerequisite courses in order for them to be eligible for enrolling in the upper 3000/4000-level courses that are a part of this certificate.

**Graduating with a certificate:** a minimum cumulative grade point average of 4.00 or greater in the courses taken to satisfy certificate requirements. Students must also submit an application to graduate from a certificate program. Applications will be obtained from and filed with the academic unit providing oversight for the certificate. Transcript notation that the requirements for a certificate have been completed will be made once the Registrar’s Office has received notice from the unit administering the certificate. Certificates will not be conferred until candidates have successfully completed an undergraduate degree program if they are simultaneously enrolled in a degree and a certificate program.

**Required courses (12 credits):**
- HH/KINE 3350 3.00
- HH/KINE 4645 3.00
- HH/PSYC 3490 3.00
- HH/PSYC 3495 3.00

A minimum of 12 credits selected from the following courses:
- HH/IHST 4005 6.00
- HH/KINE 4100 6.00
- GL/PSYC 3530 6.00
- GL/PSYC 3550 3.00
- GL/PSYC 3555 3.00
- GL/PSYC 4260 3.00
- GL/PSYC 4260 6.00
- HH/PSYC 4000 6.00
- HH/PSYC 4001 6.00
- AP/SOCI 3550 6.00
